## GREETINGS

To our many customers of the past and prospective new ones, we extend greetings. We thank you for patronage that has been given us in the past. We shall endeavor to merit a continuation of your confidence in the future.

## GUARANTEE

We guarantee all stock furnished by us to be first class, healthy and free from injurious insect pests and true to name. Stock found otherwise will, upon proper proof, be replaced free of charge or money refunded.

We do not guarantee plants to grow after planting. There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered. Claims for unsatisfactory stock can be entertained only when made within ten days after arrival.

## RISK

All stock is delivered to carrier lines in good condition and our responsibility ceases upon receipt of bill of lading. Claims for damage, loss or delay in transit should be filed with carrier upon arrival.

## SHIPPING INSTRUCTIONS

Customers should give explicit shipping instructions with order. When method of shipment is left to us we will use our best judgment and forward by cheapest method consistent with safety. Order to be shipped by parcel post or prepaid express must be accompanied with sufficient funds to cover forwarding charges, otherwise shipment will be made by shipping charges collect.

## NOTE

We can not accept orders amounting to less than one dollar.

Unfolding of Osmundas

## HARDY FERNS

Hardy ferns are some of the most useful plants for landscaping and foundation plantings. They are especially well adapted for foundation plantings along the shady side of building where few other plants succeed. They form a suitable combination with wild flowers and shrubs, and charm to the shady garden nook.

In their native habitat they grow in leafmold, rich alluvial soils and peat bogs. They will, however, thrive well in garden soil to which have been added humus in the form of peat, muck, leaves from deciduous trees or lawn clippings. A winter mulch of such material will be beneficial and should not be removed in spring.

Ferns should be planted while dormant. They may be planted in fall after frost has killed the fronds and again in spring before new growth takes place. We can ship at any time from Sept. 15th to May 15th.

Freezing will not damage the dormant roots and if they arrive in frozen condition, we suggest they be spread out in a cool place and sprinkled with water to allow thawing out slowly. Before planting they should be soaked in water for a day or so and well watered after planting.

Following is an index showing their adaptability to various conditions: R -adapted for Rock Gardens; S-for shade; B-for the border; M-Moist conditions; O-Open sun. Those best adapted for foundation planting are so indicated.

American Maidenhair. (Adiantum pedatum)-RS Foundation.
The spreading roots lie close to the surface and must be covered with leaf mold or other organic matter. Plant in places protected from wind and sun. Grows naturally in rich woodlands. A beautiful sight when growing in masses with other ferns and wild flowers. 30 c each; 3 for $75 \mathrm{c} ; 10$ for $\$ 2.00$. Not prepaid.
Beech Fern. (Phegopteris hexagonoptera)-SM
A dwarf fern of spreading habit, 6-8 inches high. Require rich soil and well protected location. Each 35 c; 3 for 75 c.

Foundation Planting. Hardy Ferns.

Blunt Lobed Woodsia. (Woodsia obtusa)-RS
Grows in crevices on rock ledges, which indicates that it requires porous soil with continuous moisture. A beautiful fern if you succeed in making it grow. Not recommended for amateurs. Each 50c; 3 for $\$ 1.25$.
Christmas Fern. (Polystichium acrosticoides)-RS
Evergreen foliage from 12 to 18 inches tall. Each 25c; 3 for 60 c.
Cinnamon Fern. (Osmunda cinnamomea) - $M$
A large fern growing to a height of 2 to 4 feet. Fronds droop and often eight inches wide. Grows in moist soil but will do well in common garden culture in semi-shade. Each $30 \mathrm{c} ; 3$ for $75 \mathrm{c} ; 10$ for $\$ 2.25$. Weigh one pound or more each packed.
Clinton's Wood Fern. (Dryopteris clintoniana)-MS
Has evergreen foliage, growing to a height of two feet. Rich, moist soil, semi-shade. Each 25 c; 3 for 60 c; 10 for $\$ 2.00$.
Crested Wood Fern. (Dryopteris cristata)-MBS
Has evergreen foliage and habits similar to Clinton Wood Ferns. Each 30 c ; 3 for 75 c ; 10 for $\$ 2.00$.
Hayscented Fern. (Dennstedtia punctilobula)-RBS
Grows to two feet high, of spreading habit. Plant in rich porous soil in sun or shade. Excellent for border planting. Each 30c; 3 for 75c; 10 for $\$ 2.00$.
Interrupted Fern. (Osmunda claytoniana)-ROS
Unlike the other osmundas the Interrupted Fern prefers moderately dry conditions. Does well in foundation plantings. Grows to a height of four feet. Weighs one pound or more packed. Each 30c; 3 for 75c; 10 for $\$ 2.25$.
Lady Fern. (Athyrium felix-femina)-ROS
One of the most desirable ferns. Does well under varying conditions, in border or foundation planting, on hillsides, in sun or shade. Each 30c; 3 for 75 c; 10 for $\$ 2.00$.
Leathery Wood Fern. (Dryopteris marginalis)-RS Foundation.
Thrives best in shade and appreciates moisture and protection from wind. 18 inches high. Each $30 \mathrm{c} ; 3$ for $75 \mathrm{c} ; 10$ for $\$ 2.00$.
Ostrich Fern. (Pteris nodulosa)-ROS
This fern is called "The Palm of the North." Fronds are six to 10 inches wide and grows to a height of 3 or 4 feet and often higher. Thrives along streams in rich, porous soil which is subjected to overflow in spring. Will multiply by runners when planted in rich porous soil. Thrives in sun or shade and gives universal satisfaction. Plant to depth of half of crown and mulch well with grass clippings or leaf mold. Each 30 c ; 3 for 75 c ; 10 for $\$ 2.00$.
Polypodium, Common. (Polypodium vulgare)-RS
Fronds $4-6$ inches long spreading in dense masses on rocks in shade or semi-shade on steep hillsides. Keep them well watered until established. Sold in squares of about 6 inches. Each 30 c; 3 for 75 c; 10 for $\$ 2$.
Royal Fern. (Osmunda regalis)-MS
Our third member of the Osmunda family. Completely different from Cinnamon and Interrupted. Fronds are deeply cut like mountain ash. Pale-green foliage, growing 2-3 feet in height. Prefers moist, shady location. Can be grown in shallow, still water or boggy soil. Each 35c; 3 for $\$ 1.00 ; 10$ for $\$ 2.75$.
Sensitive Fern. (Onoclea sensibilis)-RMO Foundation.
Fronds are different from most other ferns. Growing to a height of 6 to 30 inches forming a dense mat. Prefers moist locations. Cover roots with $1 / 2$ inch of soil. Each 30 c; 3 for 75 c; 10 for $\$ 2.00$.

Toothed Wood Fern. (Dryopteris spinulosa)-MS
Fronds 1 to 3 feet remaining green all winter. Plant crown level with surface. Each 30c; 3 for 75 c; 10 for $\$ 2.00$.
Winged Wood Fern. (Dryopteris hexagonoptera)-RS
A tiny fern which, if given proper conditions, will form a dense mat of growth in rich shady soil. 3-4 inches high. Each 30c; 3 for 75c; 10 for $\$ 2.00$.

## FERN BED COLLECTION

## A Fern Bed for $\$ 5.00$ Prepaid

These collections are selected to meet certain growing conditions as indicated. If in doubt as to which varieties will meet their particular growing conditions, customers will find these collections helpful.

Either collection listed will be shipped prepaid for $\$ 5.00$, one-half collection for $\$ 3.00$. By express not prepaid either collection for $\$ 4.00$, onehalf collection for $\$ 2.25$.

No. 1-This collection has been made up with the view in mind of offering a number of ferns which may be depended upon to succeed with a minimum of care under ordinary garden conditions. 8 Ostrich Ferns, 8 Lady Ferns, 4 Interrupted Ferns.

No. 1-A-Suitable for same general conditions as collection No. 1: 4 Clinton Wood Ferns, 8 Ostrich Ferns, 4 Interrupted Ferns, 6 Lady Ferns.

No. 2-Selected for dry shady locations. 6 Lady Ferns, 4 Hayscented Ferns, 4 Leathery Wood Ferns, 4 Interrupted Ferns.

No. 3-For moist, shady places-6 Clinton Wood Ferns, 4 Ostrich Ferns, 4 Lady Ferns, 4 Maidenhair Ferns.

No. 4-For wet ground. 6 Sensitive Ferns, 2 Royal Ferns, 2 Cinnamon Ferns, 4 Clinton Wood Ferns and 4 Hayscented Ferns.

Lady Ferns.

## PERENNIALS

## Wild Flowers and Rock Garden Plants

We offer a wide assortment of these plants. The varieties offered have all been hardy in our territory for many years. Although they are hardy, they require some covering in winter. We advise covering with coarse hay, or branches to hold the snow and to keep them from thawing out too early in the spring.

As an aid in selecting suitable plants the following index may be helpful:
*-Wild flowers.
R -Suitable for rock gardens.
S-Require shade.
O-Open, sunny situations.
B-Border plants.
C-Suitable for cuttings.
T-Trailing.
W-Of special merit for wall garden.
M-For bog, marsh or wet situations.

Note: 10 plants for three times the rate per 3.
25 plants at rate per 10 less $10 \%$.
100 plants at rate per 10 less $20 \%$.
Specimen plants selected in the nursery and dug with earth ball will be $25 \%$ higher than regular catalog prices.

Anemone Pulsatilla.

Bloodroot.
Each ..... 3
Achillea, ptarmica. (The Pearl).

- BCO -Pure white, double flowers on 2 ft . stems ..... 30 ..... 75
-BCO-Perry's White. Double, white flowers on 2 ft . stems.Very similar to The Pearl401.00
Acorus calamus. (Sweet Flag).*-Broad, grass-like leaves about 2 ft . in height, add toattractiveness of wild garden. Flowers not showy.Thrives in wet soil or shallow water2560
Actea, alba. (White Baneberry).A hardy native with long spikes of clear white flow-ers followed by glistening white berries. Require rich,moist soil and deep shade$.30 \quad .75$
-rubra, Red Baneberry. Closely resembling the white Actea. Flowers fluffy followed by red berries ..... 30 ..... 75
Anemone. (Windfower).A hardy, attractive lot of herbs for the border orwild flower garden. Thrives best in rich, sandy loamin open sun.
-_RO-canadensis. A native for the open border, grows 6 to12 inches high. White flowers in May 60
-*O-patens. Pasque flower. A beautiful and very showy dwarf growing to a height of 6 to 10 inches. Largedowny, pale-blue violet flowers in May. Thrivesbest in sunny locations in rich, moist, sandy soil _--- . 3525 90
- RO-pulsatilla, Rubra. A deep red, almost purple form ofthe above. A native of Europe, but perfectly hardyhere. Requires same growing conditions as Pasqueflower401.00
-*BS-sylvestris. An attractive plant for the shaded borderor among other wild flowers. Large, pure white,fragrant flowers3075
Aquilegia. (Columbine).Very hardy perennials which will thrive in nearlyall moist, porous soils in sunny situations. Requiresome protection from strong winds.
-OC-chrysantha. Beautiful yellow flowers ..... 2560
-OC-Crimson Star. One of the newer varieties of colum- bine. Long spurred, crimson flowers with white corolla ..... 35 ..... 90
-OC-Mrs. Elliott's. A well known and popular long spurredcolumbine in wide assortment of colors. Only mixedcolors3075
-OC-Rainbow Hybrids. A mixture of Colorado columbines, mostly long spurred. Assortment of beautiful colors. .....  30 ..... 75Arctostaphylos Uva Ursi. (Bearberry. Kinnikinnick).-*TRO-A trailing, evergreen plant, very desirable for cov-ering hillsides. Will thrive in poor, sandy soil wherefew other plants will succeed. Plant shipped withoriginal soil. Balled and burlapped501.25Arisaema triphyllus. (Jack-in-the-Pulpit, Indian Turnip).-*RS-An interesting, hardy perennial for the wild flowergarden. Requires rich, woods soil in moist shade2550
Arenaria, formosa. (Sandwort).
-OR-A low growing plant with finely cut foliage andnumerous small, yellow flowers. Suitable for rockeryin open sun

Jack-in-the-Pulpit.

## Artemesia, frigida. (Mountain Sage).

-*RO-Glistening, silvery foliage growing to a height of 18 inches. Tiny, yellow flowers in nodding racemas. Easily grown in sunny garden. Requires well drained soil. Can be cut and dried for winter bouquets .30

## Asarum canadensis. (Wild Ginger).

-*MS-Large kidney shaped leaves with chocolate colored flowers. Good ground cover plant for moist, shady woodland. Requires a soil rich in humus

$$
.25
$$60

Aster alpina. (Goliath).

- RO-A semi-dwarf aster about 12 inches in height. Blue flowers about $11 / 2$ inches in diameter

-Niobe. Plant of dwarf, compact growth with white
flowers in September ..... 50 ..... 1.25

- CBO-Mrs. Raynor. Fall blooming aster grows to a height of about 2 feet. Red flowers ..... 35 ..... 90

Aster Nova Anglia. (New England Aster).
-*OB-One of the best known of the hardy asters. Grows to a height of 30 inches. Beautiful, purple flowers in fall
-COB-Harrington's pink. A pink variety of the New England Aster501.25

Astilbe, Snowplume. (Goatsbeard).
-*RS-A fine garden plant of easy culture. The white flowers, while small, appear in great profusion during mid-summer

Baptesia australis. (False Indigo).
-BO-A strong plant growing to a height of 3 feet with dark green foliage and dark blue or purple pea-like flowers in clusters. They need full sun, open, porous, sandy soil
Calamintha alpina.
-RO-Dwarf herb of spreading habit. Purple flowers in terminal spikes. Easily cultivated in ordinary garden soil
.30
Caltha palustris. (Marsh Marigold. Cowslip).
-*M—A delightful, glistening, bright yellow, spring flower for bog or stream. Easily transplanted to garden. Will grow in rich, moist soil in partial shade
.30
Campanula carpatica. (Carpathian Harebells).
-RO-A beautiful, dwarf plant with a profusion of tiny blue flowers on wiry stems. Blooms almost continuously throughout the summer. Useful for edging or border, or as individual specimen plant
-persicifolia. (Peachbells).
-OCB-Grandiflora alba. One of the best perennial campanulas. White bell-shaped flowers. Very hardy --.---
-OCB-Grandiflora coerulea. Light blue form of above
Campanula rotundifolia. (Bluebells of Scotland).
-*RO-A very persistent grower when once established. Will grow in acid, neutral or alkaline soil, in sun or shade, on dry knolls or along creek banks. Clear, blue, bellshaped flowers in June and July
Chelone glabra. (Turtlehead. Dragonhead).
-*MS-A beautiful, late summer blooming white flower. Prefer moist, semi-shaded situation
-llyoni. Same as above having pink flowers
Chrysanthemum. (Shasta Daisy. Alaska).
-OBC-The Shasta Daisy is one of the best known of the biennials. It yields an abundance of beautiful, white flowers which are excellent for cutting .25

Lady Slipper.

Cimicifuga racemosa. (Snakeroot).
-*-Tall, hardy perennial with handsome spikes of white flowers. Well suited to the wild garden or shady border. Requires rich, well drained woods soil -..- .30 .75
Convallaria majalis. (Lily-of-the-Valley).
-*MRS—A well known, low growing, spreading plant. Small white, fragrant flowers. Thrives in rich, moist soil in shady situation .25
Cypripedium. (Lady Slipper or Moccasin Flower).
Among our most beautiful wild flowers. They require a well prepared soil, semi-shade and some protection from strong winds. Soil should be prepared by adding humus in the form of peat moss, leaf mold, grass clippings or muck, to a depth of 12 inches. Arrange bed so water will not stand around the roots for any length of time, but keep them moist at all times. Mulch in fall with leaf mold, leaves or grass clippings and leave this material on the beds to be worked in to the soil. All Cypripedium are sold by the bud only and there may be one or more buds on each plant. (We can supply acid peat in dry form to mix with soil at $\$ 2.00$ per 100 lbs .; $\$ 1.25$ for 50 lbs .)
Cypripedium acaule. (Purple or stemless moccasin).
-*MS-The large leaves lie on the ground. Long, slender stems with beautiful pink to purple flowers. Five buds for $\$ 1.25 ; 25$ buds for $\$ 5.00$.
-pubescens. (Yellow Lady Slipper).
-*MS-Of the Lady Slippers this is the easiest variety to cultivate. Grows to a height of $12-15$ inches with showy yellow flowers. Well adapted to the wild flower garden where it thrives with a minimum of moisture. When well established will multiply by layering. Five buds for $\$ 1.50 ; 25$ buds for $\$ 6.00$.
-spectabilis. (Showy or Pink Lady Slipper). The showiest and most beautiful of the Lady Slippers. Vigorous, growing to a height of 2 feet. Flowers shaded from white to bright pink. The state flower of Minnesota. Five buds for $\$ 1.75 ; 10$ buds for $\$ 3.00$.

Delphinium.

## Delphinium. (Larkspur).

Delphiniums are the queen of the blue garden perennials. While the blue shades are predominating, there are also flowers of pure white, lilac, claret, magenta and burgundy. Double and semi-double florets closely set on tall spikes. Require well drained, rich soil with ${ }^{\circ}$ some lime added. Unless well sheltered from strong winds they should be staked to prevent them from being blown down.
-Pacific Hybrids.
$-\mathrm{BCO}-V . \& \mathrm{R}$. Pacific Giants are considered to be among the best of the delphinium
-Lyondel Hybrids. Another strain of outstanding delphinium. Does not grow quite as tall as the Pacific Giants. Double and semi-double florets closely set on strong spikes. Some unusual pastel shades are produced by this strain
-chinensis. (Chinese Delphinium).
-OCB-A very different type of delphinium. Flowers are not produced on compact spikes such as the hybrids described above. Plants branched and flower clusters open and more or less scattered. A very desirable flower for bouquets. Blue flowers

$$
.35
$$

Dianthus alpina Alwoodi. (Dwarf Garden Pink).
-RBO-Dwarf plant, flowers white and shades of pink .30

Dicentra cucularia. (Dutchman's Breeches).
-*RS—An early spring blooming plant with lacy foliage growing to a height of 5 to 9 inches. Loose racemes of inverted white or pink flowers in April or May. Bulbs each 15 c; 3 for 35 c; 25 for $\$ 2.50$.

Gentian Andrewsie.

Hepatica.

Dicentra exemia. (Fringed or fern leaf bleeding heart).

- *RB-A very short plant growing to a height of 12 to 18 inches. Foliage delicately cut. Blooms all summer. While a native of the Great Smoky Mountains in the Carolinas, it is perfectly hardy in Minnesota
.35 . 90
- BO -spectabilis. (Bleeding Heart). One of the oldest perennials in cultivation and still very much in demand_- . 50

Dodecatheon meadia. (Shooting Star).
-*RS-A native plant with large, glossy, basal leaves and nodding cyclamen-like flowers in white and shades of purple and rose. Only mixed colors
Draba azoides. (Whitlow Grass).
-*RO-Tufted herb about 4 inches in height with sulphuryellow flowers in early spring. Requires light, well drained soil in open sun
Erythronium americana. (Dogtooth Violet, Trout Lily, Adders Tongue).

- *RS-Has richly mottled foliage with dainty, nodding, yellow flowers in early spring. Plant in fall or very early spring. Bulbs, each 15 c; 3 for 35 c; 10 for $\$ 1.00$.
Epigea repens. (Trailing Arbutus).
—*TRS—An attractive spring blooming plant of trailing habit. Small white or pinkish, very fragrant flowers. Somewhat difficult of culture requiring well drained, sandy, acid soil. We offer plants in original soil, balled and burlapped. Weight each 3 to 5 pounds
Euphorbia cyparissias. (Spurge).
-RO-Moss-like plant with many short plume-like branches. Yellow flowers. Much used for rock garden and cemetery planting
Funkia coerulea. (Plantain Lily).
- BO -Perennial herb with thick root system. Very willing grower in sun or part shade. Pale to deep blue flowers in clusters on tall stems

## Gaultheria procumbens. (Aromatic Wintergreen).

-*RT-Beautiful, trailing evergreen plant with glossy leaves growing to a height of 4 to 6 inches. Tiny white flowers followed by pea sized red berries. A good ground cover among evergreens. Must have well drained soil and partial shade
Gaillardia, burgundy. (Blanket Flower).
-BC-A very showy perennial, 1 to 2 feet tall. Blooms continuously over a long period. Fine for adding some flash of color to the garden. Wine-red flowers stand up well in bouquets. Thrives best in well drained soil in open sun
Gentian andrewsi. (Closed or Bottle Gentian).
-*RMS-A 2 foot native flower. Flowers purplish-blue, more or less permanently closed. At home along creek banks where ground is moist but well drained. Thrives best in grass or among other plants which provide some protection against strong winds. Should be well mulched in fall
-macrophylla. One foot tall native of Europe. Somewhat spreading type. Flowers deep blue appear in mid-summer75

Geranium maculatum. (Cranesbill, Wild Geranium).
-*RO-Plant 1 to $1 \frac{1}{2}$ feet tall. Rose-purple flowers in early summer. Thrives best in semi-open locations
.25
.60

## Geum borisi.

-O-Plant with evergreen foliage growing to a height of $12-18$ inches. Orange-scarlet flowers. At home in any good garden soil in open sun75
-*RO-triflorum. (Torch Flower). An attractive plant in the wild flower or rock garden. Finely cut foliage, beautiful soft-rose flowers followed by very attractive, silky plumed fruit90

Gypsophila paniculata. (Baby's Breath).
-CO-A well known perennial very much appreciated for cutting. Tiny white flowers giving mist-like appearance to plant when in bloom. Branches may be dried and used for winter bouquets. Requires well drained soil and open sun. A little lime added to soil will be beneficial60
-CO-Bristol fairy. White, double flowers, larger than pani- culata. Grafted plants .....  60 ..... 1.50

## Habenaria fimbriata.

-*MS-An extremely dainty and showy orchis growing to a height of 1 to 3 feet. Dainty, lavender, fringed flowers closely set on tall spikes. Bloom in late August and September. Require rich soil of acid

Hemerocallis. (Day Lily).
Very hardy and easily grown in open, sunny gardens. With three or four varieties, selected according to blooming season, you can have blossoms throughout the summer. Require good garden soil.
—apricot. Name indicates color. Bloom in June-July . 35 . 90
-dumortieri. Golden yellow flowers in June _------- . 35 . 90

## Wintergreen.

Each 3
-Mikado. One of the newer introductions. Rich, golden-yellow flowers in mid-summer ------------
-Mrs. W. H. Wyman. Pale, glistening yellow, flowers in July-August

Hepatica acutiloba. (Liverwort. Mayflower).
-*RS-A lovely, early spring flower. Low growing with three lobed leaves. Flowers, pink, blue and white. At home in rich, neutral or slightly alkaline soil in shady woodlands. Plant in fall or very early spring_-
-*RS-triloba. Closely resembling the acutiloba except having rounded, three lobed leaves. Plant thrives best on acid soil in full shade
.30
.75
IRIS cristata. (Crested Iris).
-*RB-One of the smallest iris, only 3 to 6 inches high. A native of the Blue Ridge Mountains, but, perfectly hardy in the north. Profusion of amethyst flowers in May
.30
.75
*-M-versicolor. (Blue Flag. Fleur-de-lis). The native wild iris. Grows to a height of 1 to $11 / 2$ feet. Light blue flowers in June-July. A useful bog garden plant_---
.30
.75
Lewisia rediviva. (Montana Bitterroot).
-*R-A stemless hardy plant from the Rockies. Succulent leaves about 1 inch long form low rosette. Each plant will produce many large, pink flowers which somewhat resemble the water lily. Requires poor, gritty soil with perfect drainage and open sun -.--- .35
Liatris Pycnostachia. (Kansas Gay feather).

- *BCO—A strong growing perennial reaching a height of 3 to 5 feet. Flowers small tufts of rose-purple closely set on tall spike. Useful for cutting. Thrives in poor, sandy soil in full sun. Each 20c; 3 for $50 \mathrm{c} ; 10$ for $\$ 1.25$.
-*BCO-scariosa. (Blazing Star). Very similar to Pyenostachia but growing not so tall and flowers not so closely set on spikes. For poor, sandy soil in full sun. Each 20c; 3 for 50 c; 10 for $\$ 1.25$.

Lily canadensis. (Wild Meadow Lily).
-*MS-2 to 4 feet. Drooping, bright yellow flowers in July-
August. Require well drained soil. Thrives best
-*MS-2 to 4 feet. Drooping, bright yellow flowers in July-
August. Require well drained soil. Thrives best among other plants which provide protection against winds
-B-concolor. (Star Lily). 2 to 3 feet. Flowers erect, about concolor. (Star Lily). 2 to 3 feet. Flowers erect, about
3 in. long. Bright red and unspotted. A beautiful small-flowered lily
-B-elegans. 2 feet. A very commonly grown lily which
will thrive in any garden. Showy, orange, spotted
-B-elegans. 2 feet. A very commonly grown lily which
will thrive in any garden. Showy, orange, spotted flowers -superbum. (Turk's Cap Lily). One of the most showy of our native lilies. Sometimes grow to a height of 5 feet. Beautiful yellow, spotted flowers in late summer. At home in wet meadows where it is protected by other growth
-BO-tenuifolium. (Coral Lily). 2 to 3 feet. A small lily with bright scarlet, nodding flowers. Very showy in open border
-OB-tigrinum. (Tiger Lily). 3 to 5 feet. Well known lily with drooping flowers about 4 inches wide. Orange or salmon-red, spotted flowers. Excellent for cutting. Either single or double. Each 30c; 3 for $75 \mathrm{c} ; 10$ for $\$ 2.00$
Lobelia cardinalis. (Cardinal Flower).
-*MB-A tall, erect growing wild flower of intense crimsonred color. At home in moist, semi-shaded woodlands. Requires some protection in winter

Lychnis arkwrighti. (Campion).
$-R-6$ to 8 inches. Neat little rock garden plant with bright red flowers
-R-alpina. 4 to 6 inch dwarf plant for the rock garden. Bright pink flowers
Mertensia virginica. (Virginia Bluebells).
-*BR-A very showy and attractive plant for early spring bloom. Grows to a height of $12-18$ inches. Flowers bluish tinted with pink, occasionally pure white. Excellent for mass planting in moist, rich, well drained woodlands. Each $25 \mathrm{c} ; 3$ for $60 \mathrm{c} ; 10$ for $\$ 1.50$. Jumbo size roots
Mitchella repens. (Partridge Berry).
-*RTS-A dainty, trailing, little vine at home in the shaded rock or wall garden. Creamy-white flowers followed by scarlet fruit. Roots very shallow and requires rich, moist soil only slightly acid
Monarda didyma. (Beebalm or Oswego Tea).
-*BO-An American genus of the mint family. Growing to a height of 2 to 3 feet. Flowers bright scarlet. Lend themselves to mass planting along stream or against dark background in the wild flower garden. Prefer moist, sunny location. Roots have a tendency to spread and form a dense mat. Should be divided every two years

Myosotis palustris. (Forget-me-not).
-*RBM-A low growing, spreading plant with a profusion of small, blue flowers. Requires rich, moist soil and part shade
.25
. 60
Orchis spectabilis. (Showy Orchis).

- *SM-A charming little orchis from the woodlands. Very fragrant flowers of delicate lavender. Requires rich, moist soil in deep shade. Somewhat difficult to grow
Oreganum vulgare. (Wild Marjoram).
- RO - A hardy perennial plant with aromatic, wooly foliage. Flowers purplish-blue borne on spikes or in clusters. An outstanding rock garden plant. Requires warm, moist soil in open sun
Papaver nudicaule. (Iceland Poppy).
$-\mathrm{RO}-12$ to 18 inches tall. Plants forming neat tufts of bright green fern-like foliage. Brightly colored flowers on leafless stems all season. Only mixed colors. Potted plants
-OB-orientale. (Oriental Poppy). 15 to 18 inches. Tremendous, cup-shaped blossoms of deep red. Very showy when blooming in June-July. Plant in good garden soil in open sun. Fall planting preferred, but we can supply plants from pots which will bloom this summer
Phlox decussata. (Hardy Phlox).
-OB-There is an almost endless number of hardy phlox being offered by specialty growers. We are not in position to supply a great number of varieties so we list them as to color only. Pink, red and white, of good varieties

Phlox species. (Native Phlox).
-*RT-amoena. 1 foot high. A spreading type with clusters of purplish-red flowers in early spring. Require full sun and good drainage90
-*RT-bafida. 1 foot. Low growing plant with stiff stems. Star-like flowers of violet-purple. For full sun and well drained soil
-*RB-divaricata canadensis. (Wild Sweet William). 10 in. One of the most widely cultivated of the native phlox. Large, fragrant, lavender flowers in May and early summer. Plant in semi-shade of rock garden or border in rich, well drained soil. Each 30c; 3 for 75c; 10 for $\$ 2.00$.
-ovata carolina. A native of the Great Smoky Mountains. Glistening green foliage with clusters of attractive pink flowers in May-June. Plant in rich, well drained soil
Phlox subulata. (Creeping Phlox).
A plant of trailing habit with moss-like foliage. Flowers in profusion in early summer. Excellent plant for rock garden, border and grave cover. Requires rich, well drained soil and full sun.
-subulata alba. (White Creeping Phlox). Foliage remain a beautiful green color all summer. Flowers pure white

Viola Pedata Bicolor.

## Habanaria.

## Sedum Stonecrop.

A vast family of succulent plants, many of which are hardy. The hardy varieties are ideal plants for the rock garden and wall. Some retain their green foliage throughout the year. They require full sun and well drained soil. All sedums listed hereafter are hardy.
-acre. (Golden Moss). Tufted plants with evergreen foliage spreading year after year. Bright yellow flowers. Excellent for carpeting
-album. Forming dense mat of evergreen foliage barely 1 inch in height. Completely covered with tiny white flowers
-album balticum. A slightly different type of Sedum album. Very low growing with white flowers3055
-asiaticus. Grows to a height of 6 inches. Has yellow flowers ..... 25 ..... 60
-ellacombianum. 6 to 8 inches, with pink flowers .-.- . 25 ..... 60
-lydium. Very low growing, spreading habit. Has yellow and green foliage ..... 25
-sexangulare. Also a very low growing plant similar to Sedum acre. Slightly different in foliage
-sieboldi. The most attractive of the sedums. Stronggrowing to 18 inches in height. Grayish-green, reddish toward margin, flowers pink. Potted plants

Sempervivum. (Houseleek).
-OR-These curious and interesting globular plants are very desirable for rock garden and wall as well as in the border. They require well drained soil and full sun. All varieties offered at same price
.75
-brauni. Bronze tipped leaves, yellow flowers.
-funcki. Green tipped brown rosettes in great numbers.
-tectorum. Hen and Chicks.
-trieste. Upper part bright reddish-brown, flowers bright red.
Smilacena racemosa. (False Solomon's Seal).
-*SM—A 2 foot native perennial herb, closely resembling Solomon's Seal but bearing fluffy racemas of flowers on stem terminals. Best adapted to the wild flower garden in rich woodland in semi-shade
Spirea filapendula. (Dropwort).
-BO-An ornamental plant with tuberous roots, fern-like foliage and creamy-white flowers
-ulmaria. (Goatsbeard). There are several variations of this species, differing somewhat in foliage. All have creamy white flowers in pannicles. Provide a pleasing background or for planting along streams. Will grow in shade or full sun. Green foliage .-....- 60
-ulmaria, flora plena. Has double white flowers ..... 75
-ulmaria variegate. Variegated foliage, flowers white ..... 25

Statice latifolia. (Sea Lavender, Sea Pink).
-RBCO-A useful hardy border or rock garden plant. Tufts of leathery leaves from which rise immense, airy heads of tiny purple-blue flowers. Valuable for cutting and can be dried for winter bouquets
. 30
Thalictrum aquilegifolia. (Meadowrue).
-*BM-For background planting and along stream in semimoist situations. Graceful foliage similar to columbine. Rosy-purple flowers. Grows to a height of 18-24 inches
-*BM-glauca. Steel-blue foliage with yellow flowers. Grows to $15-18$ inches in height
Thymus album. (Mother of Thyme).
-OR-3 to 6 inches tall. Useful for planting between stepping stones and for wall and rock garden. Fragrant, evergreen foliage, tiny white flowers in great profusion
-OR-lanuginosus. (Wooly Thyme). 3 to 6 inch. Fragrant, wooly foliage of steel-gray color. Pink flowers
.30
Tradescantia virginica. (Spiderwort).
-*RO-An attractive perennial for well drained, light soils. Narrow lance-shaped leaves. Three-petaled flowers of deep blue or purple
Trillium. (Wakerobin).
A very desirable plant, growing naturally in moist soil, rich in humus, and shaded by larger trees. They transplant easily in August and September while dormant, but may also be planted very early in the spring before new growth takes place. Excellent for naturalizing in colonies in shady woods.
Each ..... 3
-*RS-erectum. Strong growing to $12-15$ inches. Flowersshades of maroon2050
-grandiflora. (Snow Trillium). The most showy oftrillium. For best effect should be planted in masses.Pure white flowers in early spring. Plant in richleafmold where other plants can provide shade. Each20c; 3 for $50 \mathrm{c} ; 10$ for $\$ 1.50 ; 100$ for $\$ 10.00$.
-*RS-undulatum. (Painted Trillium). A beautiful pinktinted trillium for planting among other varieties to give contrast. Require shade60
Tiarella cordifolia. (Foamflower).-*S-Very attractive serrated foliage with racemes ofwhite flowers. Require rich soil and shade25 . 60
Trolleus ledebouri. (Globe Flower).-BS-Strong growing plant to 2 feet. Flowers yellow with$10-12$ short petals. Thrives best in moist situations .3590
Uvularia perfoliate. (Wood Merrybells).
-*RM-An erect growing native perennial having clasping,stemless leaves and gracefully drooping yellow flow-ers. Requires rich soil in shady woodland2560
Veronica. (Blue Spires).-OB-A bushy, upright plant growing to a height of 2 feet.Lovely deep blue flowers35 . 90
-spicata. A good border plant about 2 feet in height, with spikes of violet-blue flowers ..... 30 ..... 75Viola blanda. (White, Sweet Violet).-*SM-Low growing with numerous fragrant flowers. Each20 c ; 3 for $50 \mathrm{c} ; 10$ for $\$ 1.50$.-*SM-cuculata. The best known of the blue violets. Longstemmed, blue flowers. Gives a very showy effect inmass plantings in shady woodland. Require richsoil. Each 25c; 3 for 60 c ; 10 for $\$ 1.50$.
-*SM-odorata rosini. A very fragrant, tiny, pink violet ..... 30-*O-pedata. (Birdsfoot Violet). This violet grows in theopen sun in sandy soils. Flowers violet-blue. Each$20 \mathrm{c} ; 3$ for $50 \mathrm{c} ; 10$ for $\$ 1.50$.
-*S-pedata bicolor. Two-toned birdsfoot violet. Two upper petals deep violet-purple with three lower petals very soft, pale blue. A strikingly beautiful flower blooming throughout the summer. Require well drained soil and semi-shade30
-*SM—pubescens. (Yellow, Downy Violet). Kidney shaped leaves with yellow flowers. Require rich soil and part shade. Each 25c; 3 for 60c; 10 for $\$ 1.75$.
-OB-Helen Dennis. A charming, white violet on upright stems. Very hardy and a profuse bloomer. Each 25 c ; 3 for 60 c ; 10 for $\$ 1.50$.
Yucca filamentosa. (Adams Needle).
-*BRO-Large and sturdy growing plants from the wastelands of the south. Creamy-white flowers on tall spikes. While not a frequent blooming plant in the north, the plant itself is interesting and attractive .--
-*BRO-glauca. (Spanish Bayonet). Very similar to Y. filamentosa except foliage being of a steel-blue color and very sharp pointed

(NOTE: We must add packing charges to the cost of trees which are to be shipped. This cost will average about $10 \%$ of the price of the trees. On one or two trees it will be more than $10 \%$ ).

## ASH. European Mountain Ash.

A desirable tree for lawn planting. May be grown as a single stem tree or as a bush with several stems: Very showy in autumn when the fruit turns to a bright orange-red color. Fruit relished by the birds.

.65
1.50

Viburnum dentatum. Arrowhead.
Attractive foliage, white flowers in spring which are followed by fruit of a bluish-black color.

## VINES

Celastrus scandens. Bittersweet.
A native climbing vine from the woodlands. Will climb trees or trellis. We advise planting two or three plants so they can pollinate each other. In the fall they are covered with beautiful orange-scarlet berries which may be cut for winter bouquets.

Trumpet Honeysuckle.
Large, red trumpet flowers. Dark green foliage. Should have trellis for climbing.

## Engelman Ivy.

One of the few vines that will cling to brick or stone walls. Beautiful green foliage which turns to red in fall.

$$
\text { No. } 1 \text { plants }
$$

Clematis, Jackmanni.
Large, purple flowers in early summer. Plant in protected place and add lime to good soil which is well drained. Protection for winter will be well worthwhile.

No. 1 plants from large pots where they have
been started

## ROSES

Here are three that are perfectly hardy in this far north.
Each : 3

Sir Thomas Lipton. White. Bare root plants _-................. $80 \quad 2.25$

The evergreens we offer have been grown in the north and are hardy and dependable for planting in northern latitudes. They have been several times transplanted to assure a well developed root system. They have been pruned and sheared to develop symmetry and density. Specimen trees are selected for symmetry and compactness. All specimen trees are dug with solid earth ball on roots, carefully wrapped in burlap and securely tied to assure safe delivery.

Prices are for trees of our selection to be called for at the nursery. Trees to be shipped out require boxing and crating and this service will be charged for at actual cost of material and labor, usually approximately 15 to $20 \%$ of the cost of the trees, will be added for boxing.

Customers are welcome to make their own selections, but in such cases $25 \%$ will be added to the cost of the tree to compensate for time consumed in taking customers through the nursery.

## American arbor vitae.

None of these to offer in B\&B for spring 1947. Globe arbor vitae.

Compact plants of globe shape. Retaining this shape without pruning or shearing.

## Pyramid arbor vitae.

This tree grows its pyramid shape without trimming. A beautiful tree for doorway planting or as individual specimen on the lawn. Also used for cemetery planting.
